

Time Bound Statement with Targets: Founder

September 9, 2025

As a Production/Markets **Founder** Partner with the GDST, Oddisea SuperFrozen LLC endorses the GDST Standards and Guidelines for Interoperable Seafood Traceability Systems and is committed to its adoption and implementation across the seafood sector worldwide. We recognize that, although implementation of GDST standards may require a phased approach:

1. Interoperable traceability is critically important to responsibly produced, globally traded seafood.
2. GDST's Core Normative Standards are mandatory for interoperable traceability implementation.
3. Dialogue participation gives GDST partners a voice to effect change and help evolve the standard.

As a **Founder** level Partner, Oddisea SuperFrozen will continue to adopt and implement the GDST standards **in our operations and supply chain** for all seafood products purchased internationally and domestically. Leveraging the past engagement and success of our predecessor companies, Culinary Collaborations and Culimer USA, we will define and share specific measurable targets for adoption/implementation with GDST.

We grant to the GDST the right to publish this adoption statement on their website www.thegdst.org.
